Message from the Guest Editor

Dear Colleagues,

Diet and nutrition play critical roles throughout the cancer continuum. Diet is also a central component during antineoplastic treatment that may be altered by treatment, and can have a profound influence on health and treatment outcomes. For many survivors, a healthy diet should be a priority. However, there are a number of challenges in conducting and interpreting diet–cancer relationships related to methodological limitations, the heterogeneity of studies, and the need for replication of findings.

This Special Issue of *Nutrients*, “Nutrition and Cancer: From Prevention to Survivorship”, aims to inform our knowledge of diet–cancer relationships and welcomes the submission of manuscripts examining the impact of diet and dietary components throughout the cancer continuum. Topics of interest include but are not limited to those described above. Manuscripts that use new technologies and approaches such as the use of biomarkers of dietary exposure and the consideration of dietary patterns are of particular interest. Epidemiological, interventional, and systematic reviews, and meta-analyses, are welcomed.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
