Message from the Guest Editors

Dear Colleagues,

The goal of this Special Issue, “Rehabilitation Nutrition in Older People”, is to focus on the importance of rehabilitation nutrition in improving nutritional status, sarcopenia, and frailty in people with disabilities and frail older people.

Specifically, the aim is to clarify if rehabilitation nutrition (a combination of both rehabilitation and nutritional management) and the rehabilitation nutrition care process can improve body functions, activities, and quality of life.

This Special Issue is to update knowledge on rehabilitation nutrition in older people. All types of manuscripts, including clinical research, epidemiological research, and up-to-date reviews (scoping and systematic reviews, as well as meta-analyses), are welcome.

Dr. Ryo Momosaki
Dr. Yoji Kokura
