Special Issue

The Benefits of Exercise and Dietary Factors to Prevent Gestational Diabetes Mellitus

Message from the Guest Editors

Gestational diabetes mellitus (GDM) is a type of diabetes first diagnosed during pregnancy, with increased morbidity and mortality for both mother and fetus. The associated hyperglycemia develops due to the reduced status of insulin sensitivity, attributed either to the increased degree of overweight/obesity of the mother or to the presence of PCO syndrome, the burdened family history and the higher age of the mother. Increased physical activity has been well documented to be beneficial for improving insulin sensitivity with direct regulation of various biochemical and molecular mechanisms, while supporting the loss of the excess weight of the mother. Additionally, incorporating a balanced diet, rich in nutrients, possesses a crucial role in the management of insulin resistance. Therefore, a healthy prenatal, or early in pregnancy, lifestyle plays a significant role in the prevention of gestational diabetes mellitus, and manuscripts addressing the above subjects are welcomed for submission in this Special Issue, particularly when they combine the above-mentioned topics for the prevention of GDM development

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. Nutrients adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of Nutrients has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluis Serra-Majem

- Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
- Research Institute of Biomedical and Health Sciences (IUIBS),
 University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
 Preventive Medicine Service, Centro Hospitalario Universitario
 Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez
