## Nutrition in Hemodialysis

### Message from the Guest Editor

Nearly 800,000 people are affected by end-stage kidney disease, and among them, about 70% are on dialysis. Once patients are placed on dialysis, their quality of life is significantly altered, with substantial emphasis on the importance of nutrition and dietary restrictions. Understanding the role of nutrition and the microbiome in hemodialysis is of vital importance to help improve patient care and promote kidney health.

### Guest Editor

Dr. Sherry Mansour

Program of Applied Translational Research, Yale University School of Medicine, New Haven, CT, USA

### Deadline for manuscript submissions

closed (27 March 2023)

## About the Journal

### Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
