Interaction between Polyphenols and Gut Microbiota in Cancer

Message from the Guest Editor

Dietary polyphenols are natural compounds present in plants with important biological functions. These include their antioxidant, antifungal and antibacterial properties. In vitro studies have also demonstrated their anti-inflammatory and antiproliferative effects. On the other hand, the microbiota, mainly digestive, is receiving a great deal of attention since its metabolites seem to influence an increasing number of physiological processes. This could be of vital interest for the treatment of highly prevalent pathologies such as cancer. In fact, the direct relationship between polyphenol metabolism and the digestive microbiota has been demonstrated, and the relationship between inflammatory phenomena and intestinal dysbiosis is also known. However, in vivo studies are more scarce. In any case, the variety of existing food polyphenols and pre/probiotics is very large, and more research is needed on the relationship between them and tumor transformation to find effective treatments that take advantage of their properties.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
