Impact of Dietary Supplements on the Enhancement of Exercise Performance

Message from the Guest Editor

Sports nutrition and supplementation determine performance, physical fitness, recovery and exercise-induced adaptation capacity, as well as the athlete's nutritional status, well-being and health. These aspects are therefore crucial both in the training of elite athletes and people who practice sport recreationally, regardless of gender and age. The main purpose of this Special Issue, "Impact of Dietary Supplements on the Enhancement of Exercise Performance", is to focus on the multidimensional and diverse impact of supplementation in elite and moderately trained athletes, as well as recreationally active people. Specifically, our aim is to clarify if using certain supplements and the protocols of their supplementation can influence exercise performance and physical fitness and nutritional status.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain
