The Effect of Lipoprotein Metabolism on Diabetes and Liver Disease

Message from the Guest Editor

It has long been known that there is a close relationship between abnormal glucose metabolism and liver disease. Dyslipidemia is closely related to type 2 diabetes, NASH/NAFLD, and insulin resistance, in which the former three find a common pathophysiological basis. Ectopic steatosis of the liver and pancreas induces insulin resistance and contributes to the onset of type 2 diabetes, while non-alcoholic fatty liver (NAFL) can progress to NASH. What is the mechanism by which insulin resistance develops from fat accumulation in the liver and the pancreas against a backdrop of overnutrition and obesity? This mechanism is also being researched. Furthermore, various treatments for improving ectopic fat deposition in the liver and pancreas have been reported. Consequently, this Special Issue, “The Effect of Lipoprotein Metabolism on Diabetes and Liver Disease”, aims to gather scientific evidence for the effects of dyslipidemia on diabetes and liver disease and how these effects contribute to pathogenesis.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
