The Role of Nutrition and Supplementation in Cancer Risk and Progression

Message from the Guest Editor

The latest advances in oncology are clearly indicating that enormous improvements in cancer risk and progression can be achieved by the optimization of diet. Many ingredients of food including microelements, vitamins, amino and fatty acids, proteins, and others are critical for the effective functioning of the body. There is a lot of attractive data on the influence of diet on cancer risk and progression, but their validation as well as new discoveries are strongly needed. All researchers that are enthusiastic or at least interested in contributing to the progress in oncology based on nutrition and supplementation are welcome to submit original research articles (both intervention and association studies) and reviews (with preference for systematic reviews and meta-analyses) to this Special Issue.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain
