# Integrated Approach to Oral Health, Rehabilitation and Nutrition

### Message from the Guest Editor

Patients suffering from various diseases and the elderly have a combination of impaired ADL, poor nutrition, sarcopenia, oral problems, and dysphagia, and their health deteriorates as a result of their interactions with each other. Simultaneous and integrated rehabilitation, nutrition, and oral health care are essential to prevent ADL decline and maintain and improve overall health. Today, such efforts are being promoted in Japan, and I would like to solicit a wide variety of research results on the outcomes of such integrated efforts of oral health, nutrition, and rehabilitation through collaboration among multiple professions. By presenting review articles and research results on nutritional intake and oral functions that play a role in effective exercise therapy and rehabilitation, I hope to clarify the importance of efforts to package rehabilitation with oral health and nutrition.

### Guest Editor

Prof. Dr. Mitsuyoshi Yoshida

Departments of Dentistry and Oral-Maxillofacial Surgery, School of Medicine, Fujita Health University, Toyoake, Japan

### Deadline for manuscript submissions

15 December 2025

## About the Journal

### Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
