Perioperative Nutritional Intervention: Its Scope and Influence

Message from the Guest Editor

Nutritional support is a great pillar of modern perioperative care. Numerous studies have confirmed that malnutrition constitutes an important risk factor of postoperative complications and may influence short- and long-term outcomes, including mortality. Subjects who are malnourished do not recover well. Therefore, reliable screening tools should be used and proper nutritional intervention implemented amongst those who are at risk of undernutrition, or, of note, are malnourished. This Special Issue covers all aspects of scientific research devoted to the assessment of malnutrition and nutritional therapy and its consequences. All branches of surgery are of interest. High-quality original and review papers are welcomed.

Guest Editor

Prof. Dr. Łukasz Krzych

Department of Acute Medicine, Medical University of Silesia, Zabrze, Poland

Deadline for manuscript submissions

20 December 2025

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez
