

Special Issue

The Impact of Food Fortification on Health and Nutrition Outcomes

Message from the Guest Editor

In many settings, micronutrient deficiencies remain in parallel to, and may even exacerbate, growing epidemics of communicable and noncommunicable diseases. Food fortification increases the micronutrient density of foods, supporting increases in immune and metabolic competence, improving health outcomes. It is critical to effectively link the increased intakes of micronutrients of concern with related improvements in health outcomes.

This special issue of *Nutrients* welcomes original research and reviews covering food fortification impacts on nutrition and human health outcomes. The scope of this issue spans from preparatory research evaluating dietary patterns and current health issues towards selection of foods for fortification, to clinical and population-based studies of efficacy and effectiveness. It encompasses studies ranging from the evidence-based exploration of the potential health impacts of future fortification, to the direct quantification of micronutrient bioavailability and impacts on nutrition and health outcomes.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
