Prevention, Management and Treatment of Bone-Related Diseases Using Natural Products

Message from the Guest Editors

This Special Issue on natural products aims to provide a comprehensive overview of their potential use in the prevention, management, and treatment of a wide range of bone-related diseases such as osteoporosis, inflammatory joint diseases, osteopetrosis, diabetes mellitus, obesity, and bone cancer. Natural products are a rich source of bioactive compounds with valuable applications in several industries, such as pharmaceuticals, medicine, food, and biotechnology. There is a growing interest in medicinal and bioactive compounds obtained from natural products for their significant health benefits. We invite original research articles and review articles covering the molecular, biochemical, morphological, pharmaceutical, and medical aspects of these topics. We look forward to your valuable contributions and advances in the field of natural products associated with bone-related diseases.
