

## Special Issue

# Nutritional Screening and Assessment of Different Populations

### Message from the Guest Editors

Nutritional screening and assessment in diverse populations is of great relevance to both scientific research and public health. This approach is essential for the generation of rigorous scientific evidence and the development of more accurate and effective intervention strategies in the field of nutrition. In scientific terms, nutritional screening and assessment in diverse populations promote research. These joint efforts enrich the knowledge base and scientific evidence in the field of nutrition, resulting in significant advances in understanding specific nutritional needs and optimising healthcare. This Special Issue will incorporate research from all perspectives, focusing on nutritional assessment in various population groups as well as its potential health implications. All types of manuscripts are encouraged, from rigorous randomised clinical trials to pragmatic community-based designs. Therefore, interventions related to diet, dietary habits and their relationship with the nutritional status of a population, and nutritional status assessment are welcome. Original research papers as well as systematic reviews and meta-analyses will be accepted.

### Guest Editors

Prof. Dr. Aránzazu Aparicio Vizquete

VALORNUT Research Group, Department of Nutrition and Food Science, Faculty of Pharmacy, Complutense University of Madrid, 28040 Madrid, Spain

Dr. M<sup>a</sup> del Carmen Lozano Estevan

## About the Journal

### Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
