Investigation of Nutrition and Health Status of Masters Athletes

Message from the Guest Editor

Dietary risks are some of the leading causes of death and disability globally. A healthy lifestyle, with good nutrition as an integral component, is known to be associated with a lower risk of chronic conditions even if adopted later in life. Masters athletes engage in activity and sports beyond population guidelines and frequently engage in sporting competition. They are known to be healthier than their sedentary peers; however, there is a need to know more about their dietary behaviours and the link to nutrition and health status. This Special Issue invites submissions of manuscripts either describing original research or reviews with a focus on the nutrition and health status of masters athletes. Submissions relating to nutrition and/or exercise metabolism in humans are welcome; however, submissions on in vitro work and animal models are not a focus of this Special Issue.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
