

## Special Issue

# Nutrition and Diet on the Prevention and Management of Cancer and Other Chronic Diseases

### Message from the Guest Editors

Cancer and other chronic diseases are the leading causes of death. Poor nutrition/diet are common and major determinants in the development of most cancers and chronic diseases. In addition, poor diet is also highly correlated with low SES and other unhealthy behaviors, such as smoking, alcohol drinking, and physical inactivity.

In this Special Issue, we will present state-of-the-art approaches in dietary/nutrition, which aim to better understand the cause of nutrition-related diseases, their consequences, and prognosis. Nutrition and dietary factors including dietary patterns, micronutrients, antioxidants, dietary intervention, innovation approaches, or new technology applications are highly welcome topics in this issue. Original articles or short communications that advance current knowledge on the role of nutrition and diet on cancer and chronic disease are also welcome. ***20% APC waiver code and additional waiver may apply through the editor by 12/31/2024***

### Guest Editors

Dr. Tung-Sung Tseng

Behavioral and Community Health Sciences, LSUHSC School of Public, New Orleans, LA 70112, USA

Dr. Liwei Chen

Department of Epidemiology, Fielding School of Public Health, University of California, Los Angeles, 650 Charles E. Young Drive, Los Angeles, CA 90095, USA

### Deadline for manuscript submissions

closed (25 December 2024)

## About the Journal

### Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
