

Special Issue

Food Nutrition Labels in Relation to Diet and Public Health

Message from the Guest Editors

Food labels are a tool to promote public health by providing information which allows consumers to make informed dietary choices. It welcomes contributions from any qualified individual or group within the food sector that is based upon original research, reviews of the literature and evidence-based commentaries focusing on:

Measurement of the absolute impact (or not) of established FoP systems on consumer behaviour and choice.

Research on the impact (or not) of FoP labels on manufacturer behaviours such as food product formulation, design, and marketing.

The consumer learning and choice mechanisms that are used to evaluate food nutritional labels and the products that carry them.

The relationship between FoP label system and specific consumer cultures, attitudes, or beliefs.

The Editors welcome contributions from academic researchers, and also informed individuals/groups who are participating in the food sector in other roles.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
