## Fructose Metabolism and Diabetes – Where Do We Stand Now?

### Message from the Guest Editor

Fructose is a monosaccharide with a higher protein glycolytic capacity than glucose that metabolizes faster than acetyl CoA due to the absence of rate-limiting enzymes such as glucokinase. It is also considered more toxic than glucose. Excessive sucrose intake is associated with obesity, hyperuricemia, type 2 diabetes, dyslipidemia, NAFLD, frailty, and cancer. Moreover, fructose has been thought to be metabolized in the liver, not in the small intestine. However, recent studies have shown that small amounts of fructose are completely converted to alucose, and its metabolites have been found in the small intestine. Furthermore, it has been shown that unabsorbed fructose is converted to acetic acid by intestinal bacteria, absorbed through the portal vein, and used for lipid synthesis. Therefore, when considering the mechanisms underlying fructoseinduced fatty liver development, it is important to consider the role of the small intestine and even the intestinal microbiota in addition to the conventional liver. Furthermore, exogenous as well as endogenous fructose has been reported to cause renal damage.

## About the Journal

## Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

### Editors-in-Chief

#### Prof. Dr. Lluis Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain

 Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

#### Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

### **Author Benefits**

#### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
