Nutrition and Diet in Prevention and Treatment of Liver Cancer

Message from the Guest Editor

Liver cancer is a significant global health burden and the third-leading cause of cancer-related deaths worldwide. Diet and nutrition are emerging as key modifiable factors that may influence liver cancer risk and prognosis. Research suggests that a high intake of red meat and dietary sugar are positively correlated with hepatocellular carcinoma (HCC) occurrence, while a high consumption of white meat, fish, vegetables, fruits, cereals, and whole grains is inversely associated with HCC risk. However, the relationship between diet and liver cancer is complex, and further investigation is required in order to clarify these associations and better understand the role of dietary factors in liver cancer development and progression. We are pleased to invite you to submit original research or systematic reviews exploring these relationships, with the aim of developing effective dietary interventions for the prevention and treatment of liver cancer.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain
