Dietary Considerations for the Prevention and Management of Liver Disease

Message from the Guest Editors

“Let food be thy medicine” In this Special Issue of *Nutrients*, we will address several important aspects of this interdisciplinary biomedical field based on new and clinically relevant information that may impact patient care, as well as lead to novel opportunities for research and discovery. Among others, potential topics to be considered for publication in this issue are:

- Weight loss interventions/dietary patterns and components/plant-based foods and their bioactive compounds in nonalcoholic fatty liver disease;
- Nutritional assessment and management of liver cirrhosis in compensated and decompensated states;
- Enteral versus parenteral nutrition in acute and acute-on-chronic liver failure;
- Phytosterols/Omega-3 PUFA in nonalcoholic fatty liver disease;
- Probiotics and dietary interventions in hepatic encephalopathy;
- Combating sarcopenia in liver disease;
- Nutritional supplementation after liver transplantation.
