Nutritional Support for Kidney Transplantation

Message from the Guest Editors

Generally, patients require optimal post-transplant support to address metabolic abnormalities, potential delayed graft function, postsurgical complications, and gut disturbances that contribute to undernutrition. Nutritional requirements also evolve over time following transplantation, necessitating individualized management. However, further research is necessary to fully comprehend the significance of nutrition support in kidney transplantation. Specifically, more evidence is needed regarding the effects of post-transplant nutrition on renal function deterioration, obesity, diabetes/hyperglycemia, hypertension, and bone disease. Additionally, it is crucial to investigate the role of nutritional support in maintaining graft function and effectively treating post-transplant complications. This section on nutritional supports in kidney transplantation welcomes papers encompassing a broad range of topics, including nutritional interventions, microbiome studies, nutrition and medication interactions, and lifestyle modifications in kidney transplant environments.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Food Science)
