

Special Issue

Insights and Innovation for Colorectal Cancer Management: Diet and Nutrition Factors

Message from the Guest Editors

Dear colleagues, This Special Issue, aims to bring together cutting-edge research exploring colorectal cancer prevention, risk reduction, and survival, with a particular focus on how specific individual and community contexts influence cancer management behaviors and outcomes, including the role of dietary guidelines and several modifiable cancer-related behaviors.

We accept articles covering a variety of topics relevant to colorectal cancer management such as nutritional aspects, social factors, or a combination of both. Specific topics include diverse cancer control guidelines, such as dietary patterns, levels of physical activity or obesity, perspectives and insights into individual behaviors and the built environment, implications of health information, perceptions of prevention behaviors, and social or environmental factors that influence access to resources for colorectal cancer prevention, management, and support, including the value of immunonutrition in patients undergoing surgery or in support of cancer therapies.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
