Investigating the Health Benefits of Edible Products Derived from Bees and Other Economic Insects

Message from the Guest Editors

Recently, some economic insects such as silkworms, bees, and mealworms have gradually gained popularity as natural/functional foods or supplements due to their nutritional/bioactive characteristics that are beneficial to human health. To enhance the quality and utilization of edible products derived from economic insects, it is crucial to strengthen the evaluation framework of their physicochemical and biological characteristics related to quality and safety standards while also promoting research on the development and application of insect-based products. We keenly invite submissions to this topic. The topics include, but are not limited to, the following:

- Identification of physicochemical, nutritional, biological, and genetic characteristics of insect products;

- Evaluation of biological/functional activities of insect products;
- Research on food allergens in insect products;
- Study on anti-nutrient substances in insect products.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
