Nutrition and Food Security for All: A Step towards the Future

Message from the Guest Editors

On the global development agenda, ensuring food and nutritional security has been a primary priority. Even still, by 2030, more than 600 million people will be chronically undernourished. The key to ending food insecurity in many countries is to foster a positive attitude toward food, nutrition, and health. To achieve the global Sustainable Development Goal (SDG) 2, it is critical to recognize the significance of a varied, balanced, and nutrient-rich diet. To promote healthy diets, food security, and sustainable availability, it is also essential to find ways to increase local and regional production and food consumption.

Taking into account these premises, this Special Issue aims to present original research articles, reviews, commentaries, and short communications concerning the following topics: Food choices; Food safety; Food security around the world; Food waste; Healthy foods; Food policies; Food supplements; Malnourishment; New foods; Nutritional needs and recommendations; Nutrition and chronic diseases; Public health and nutrition; Sustainability

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
