Special Issue

Nutritional Modulation of Gut Signals

Message from the Guest Editors

The gut produces and releases a myriad of endogenous and microbiome-derived factors. The gut also releases other factors that activate local afferent nerve terminals and enter the circulation, such as serotonin, dopamine, and NPY. Altogether, gut-derived factors regulate several aspects of physiology, including lipid and glucose metabolism, insulin secretion and sensitivity, brain energy balance, cardiovascular function, autonomic nervous system activity, and endocrine axes, such as the thyroid or the reproductive system. However, although diet is known to play a pivotal role in inducing their release, the dietary factors responsible for stimulating specific gut hormones, neurohormones, and microbiome-derived factors have yet to be elucidated. This Special Issue is dedicated to highlighting research aiming to disclose new dietary factors involved in such modulation and the implications for other physiological systems, particularly for regulating metabolic balance.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. Nutrients adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of Nutrients has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluis Serra-Majem

- Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
- Research Institute of Biomedical and Health Sciences (IUIBS),
 University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
 Preventive Medicine Service, Centro Hospitalario Universitario
 Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
