

Special Issue

Nutrition and Pediatric Liver Disease

Message from the Guest Editors

The prevalence of pediatric liver disease is increasingly worldwide and representing a major public health concern. Although, several factors are involved in this increase, nutrition is playing a critical role in liver disease pathogenesis.

The objective of this proposed Special Issue on “Nutrition and Pediatric Liver Disease” is to publish selected papers (Original research articles, review article, case reports) that will provide the understanding and implication of nutrition in pathogenesis of pediatric liver disease. Also covers the topic of dietary intervention and related therapeutics approach to minimize the risk of liver diseases in pediatric population. In addition, issue will provide the comprehensive understanding and investigation of involved metabolic pathways and nutrition based preventive/therapeutic approaches that can be applied to reduce the hepatic complications in children. Lastly, the knowledge of potential predictive biomarker for liver function/disease at early stage will be helpful to develop therapeutic options for pediatric liver disease.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
