Food Intake and Addictive Eating

Message from the Guest Editors

Pathological overeating is frequently linked to an increased incidence of obesity, one of the leading causes of death in the industrialized world. Susceptible individuals might become addicted to food by losing control over the ability to regulate its intake and, thus, develop an eating disturbance.

The addictive properties of palatable foods and the recognition of food-related disorders as addictive behavior are quite recent and controversial concepts. Different tools have been developed and many studies have been performed to assess, understand, and control the food addiction phenomenon. However, the mechanisms involved in this addictive-like behavior are not yet well established.

The focus of this Research Topic is to support a deeper understanding of the scientific and clinical aspects of food addiction. We welcome submissions of articles providing novel insights into food addiction or novel methods for assessing addictive-like behavior.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
