

Special Issue

Preventive Nutrition for Chronic Non-communicable Diseases and Their Risk Factors

Message from the Guest Editor

The occurrence of chronic non-communicable diseases (NCDs) in the world population has been increasing even before the restriction of social mobility due to the COVID-19 pandemic. There are still important gaps in knowledge regarding the incidence of NCDs and their risk factors. Public health policies for these diseases aimed at promoting health by focusing on different aspects of risk factors could be better formulated if we understand the social de-terminants of NCDs by analyzing regional differences, gender and ethnic/racial and socioeconomic heterogeneity to generate knowledge that supports the decision-making process. The objective of this proposed Special Issue on "Preventive Nutrition for Chronic Non-Communicable Diseases and Their Risk Factors" in *Nutrients* is to publish selected papers that have investigated associations between chronic diseases and biological, behavioral, environmental, occupational, and social factors.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
