Human Milk, Fortifiers, and Infant Formula Innovations: Advancing Nutrition and Health in Preterm and Term Infants

Message from the Guest Editor

Feeding during early life is of major importance and has short- and long-term health consequences.

Breastfeeding has been reported to be the best method to feed infants. Therefore, every effort should be made to breastfeed infants for as long as possible. However, this may not be possible for every infant. Therefore, efforts to optimize a second choice of feeding, formula feeding, are also needed. In this Special Issue, we aim to highlight recent advances focused on optimizing infant feeding. I invite our readers to share the results of their research in this area.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluis Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez
