

Special Issue

Eating Disorders Related to Emotion and Psychology

Message from the Guest Editors

Eating disorders are diseases closely related to a person's psychology and spirit. They can cause physiological changes in the body and affect nearly every organ system. Therefore, exploring the relationship between eating disorders and psychology is of great significance for prevention and treatment. The focus of this Special Issue is to support a deeper understanding of eating disorders and their psychological and spiritual aspects. We welcome the submission of articles that provide new insights about restrictive eating attitudes, behaviors, and binge eating, with a special focus on nutrition and dietary management. Original research articles and reviews are welcome.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
