Dietary Protein and Surgery Patient

Message from the Guest Editor

Early oral feeding is crucial in determining surgical outcomes, especially for those undergoing gastrointestinal (GI) surgery. Avoidance of any nutritional therapy and subsequent malnutrition bears the risk of underfeeding during the postoperative course after major surgery and is considered a risk factor for postoperative complications. On the other hand, malabsorption and malnutrition are common problems encountered in the management of GI surgical conditions, especially among patients who undergo GI surgeries for malignancies.

Normal protein metabolism is crucial in surgical patients. There is a paucity of data regarding targeted daily protein intake and its effect on fat-free mass. Sarcopenia is a common complication that persists up to two years post-major surgery. Patients with sarcopenia were three times more likely to experience postoperative complications after GI surgery, twice as likely to be readmitted, and have a poorer quality of life. Nutritional restoration of protein remains a conundrum among upper GI surgical patients, especially among those after GI surgery.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
