

## Special Issue

# Nutritional Status and Interventions for Patients with Cancer

### Message from the Guest Editors

Cancer is one of the leading causes of morbidity and mortality worldwide. The diet and nutrition conditions of the individuals are modifiable risk factors in the development of several cancers and a predominant component in the recovery and effectiveness of the treatments. Cachexia management remains a challenge in clinical practice and malnutrition is accepted as a significant negative predictive and prognostic factor in all cancer patients. The importance of metabolic interactions within the tumours are crucial and the mechanisms by which dietary factors might increase or decrease therapeutic intervention are key factors to unravel the nutrition influences in cellular and molecular processes in cancer. This Special Issue is committed to publishing original research articles on cancer nutrition-related intervention, diagnosis, and prevention.

## About the Journal

### Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
