

Special Issue

Dietetic Care in Primary Care and Prevention

Message from the Guest Editor

The purpose of this Special Issue, titled “Dietetic Care in Primary Care and Prevention”, is to publish a focused, well-referenced volume examining how dietetic care contributes to the prevention and management of chronic diseases within primary healthcare settings. This Special Issue aims to explore the essential role of comprehensive dietary support and preventive nutrition in promoting health, reducing chronic disease risks, and enhancing the overall well-being of healthcare providers. Through studies on the implementation of nutritional strategies in primary care, we aim to contribute to best practices for the prevention of common chronic diseases, as well as to understand the impact of dietetic support on the well-being of healthcare providers, including its role in mitigating burnout. Manuscripts should present robust, detailed evidence on clinical preventive nutrition and dietary management within primary care. We welcome experimental, clinical, translational, and behavioral studies, as well as reviews and meta-analyses.

Guest Editor

Dr. Luis Albendín-García

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
