Nutritional Requirements and Parenteral Nutrition in Preterm Infants

Message from the Guest Editors

Neonatal parenteral nutrition has been in routine clinical use in preterm infants for more than 40 years and yet the field remains highly controversial. The initiation, targets and formulations for both macronutrients and micronutrients continue to provoke debate. This is reflected in variations in clinical practice which persist despite the move to more standardization and quality improvement in neonatal services. The PN-dependent period coincides with early postnatal metabolic and immune adaptation. The role of optimal parenteral immunonutrition while minimizing metabolic disturbance is a field of growing importance. Similarly, postoperative preterm parenteral nutrition after necrotizing enterocolitis provides even greater research complexity particularly in those infants facing the clinical challenge of long-term parenteral nutrition. Finally, there are the lifelong benefits and risks of preterm parenteral nutrition: brain growth and neurodevelopment versus adult cardiovascular and metabolic disease. This issue will tackle some of these research questions using the latest methodologies and clinical strategies.

Guest Editors

Prof. Dr. Colin Morgan

Department of Neonatology, Liverpool Women's Hospital, Liverpool L8 7SS, UK

Prof. Dr. Frank H. Bloomfield

Director of the Liggins Institute and Professor of Neonatology, University of Auckland, Auckland 1142, New Zealand

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
