

# Topical Collection

## Clinical Nutrition in Kidney Disease

### Message from the Collection Editor

As we all know, standardizing the prevention and treatment of kidney diseases it is no longer sustainable. Today, the diagnosis and treatment of kidney diseases must be conducted using precision medicine that is tailored to the patient. This Topical Collection aims to encourage the presentation of works on the latest nutritional strategies for patients at all stages of chronic renal failure, while also taking physiological renal aging into account. Furthermore, diffusion must be encouraged when prescribing a personalized nutritional plan alongside incremental dialysis strategies. Finally, it is necessary to apply a precise nutritional approach for former patients with recurrent kidney stones. This Topical Collection encourages authors to submit original research articles or reviews addressing these areas.
