Interaction Between Gut Microbiota and Obesity

Message from the Guest Editor

In recent decades, human gut microbiota has been shown to be a key agent in the prevention and development of numerous metabolic pathologies, including obesity. Gut microbiota exerts a miscellany of protective, structural, and metabolic effects on both intestinal and peripheral tissues, thus affecting body weight by modulating metabolism, appetite, as well as hormonal and immune systems.

In this Special Issue of *Nutrients*, we extend an invite to the scientific community to submit their latest advances in the knowledge of the complex interactions between gut microbiota and obesity. Manuscripts describing the effects of bioactive compounds, food ingredients, contaminants, or any environmental element on the different microbial populations in the human gut are welcome. Also, the effects of eubiosis altering agents, as well as dysbiosis correcting agents, such as prebiotics, probiotics, symbiotics, or postbiotics, are of great interest for this Special Issue.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
