Nutritional Intervention in the Intensive Care Unit: New Advances

Message from the Guest Editor

This Special Issue, entitled "Nutritional Intervention in the Intensive Care Unit: New Advances", within the section Clinical Nutrition, aims to provide an overview of the field of nutritional therapies in critical care. This Special Issue welcomes articles that address topics such as probiotics, prebiotics, vitamins and minerals, dietary supplements, essential nutrients, food as medicine, food and the microbiome, diet and dietary patterns, malnutrition, failure to thrive, human milk and medical outcomes. In addition, various study designs (prospective or observation studies) will be considered. This Special Issue aligns with the landscape of clinical nutrition at the national level, particularly as the NIH's plan to consider whole-person health is a current priority; this also includes mindful eating and the psychological and behavioral aspects of nutrition.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
