Nutritional Support for Improving the Life Quality in Liver Disease

Message from the Guest Editor

Nutritional support for liver disease is essential for patients' prognoses and quality of life. Therefore, knowledge and information around diet and nutrition may help physicians to treat cases of various liver diseases. For this purpose, we invite investigators from various fields, including physicians and nutritionists, to contribute original research articles, systematic reviews, mini-review articles, or case series that contribute towards this aim. In addition, manuscripts focusing on multi-disciplinary collaboration in nutritional support are also appreciated.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
