

## Special Issue

# Diet, Lifestyle and Chronic Disease in Early Life

### Message from the Guest Editors

We are excited to announce our upcoming Special Issue on “Diet, Lifestyle and Chronic Disease in Early Life”.

This Special Issue will focus on the associations of nutrition and lifestyle factors with the development of chronic diseases later in early life. We welcome original research articles, systemic reviews and meta-analyses that explore the following topics:

- The effects of early life nutrition on childhood health outcomes related to chronic diseases;
- The associations of diet and lifestyle factors on chronic disease risk during childhood and adolescence;
- Strategies to improve early life nutrition and lifestyle to prevent chronic diseases.

We encourage submissions from a variety of disciplines, including nutrition, epidemiology, public health, and medicine. Manuscripts will undergo a rigorous peer-review process to ensure their high quality and relevance to the Special Issue theme. We look forward to receiving your contributions.
