

Special Issue

Behavioral Nutrition and Lifestyle Interventions to Prevent and Control Non-communicable Diseases

Message from the Guest Editor

This Special Issue on “Behavioral Nutrition and Lifestyle Interventions to Prevent and Control Non-Communicable Diseases” will invite a wide range of research, with the common focus being on real-world implementation of interventions targeting dietary behaviors to promote public health. The range of non-communicable diseases addressed could include cardiometabolic diseases and common mental disorders, as well as co-morbidities of these two. Studies should target either prevention or management aspects or both. While most articles in this issue should present empirical research, also 1–2 review articles will be considered. Types of empirical research may cover formative research, description of intervention development, as well as evaluation of implementation and effectiveness outcomes.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
