Towards Better Dietary Guidelines: New Approaches Based on Recent Science

Message from the Guest Editors

The U.S. Dietary Guidelines for Americans (DGA) is the country's top nutrition policy, launched in 1980 and updated every five years by the Departments of Agriculture and Health and Human Services. This broadly influential policy is considered a global gold standard. The DGA has been unable, however, to stem the still-rising epidemics of obesity, diabetes, and other metabolic diseases. Among the reasons for this problem is one identified by National Academies of Sciences, Engineering and Medicine, namely, the need to update the DGA scientific review methodology in order to assure reliable results. Two topics where a more comprehensive evaluation of the current science could result in updated results are saturated fats and salt. The DGA policy could also expand its focus from disease prevention to include treatment of these diseases. This could involve a consideration of diets lower in carbohydrates than those recommended in the current DGA.

Guest Editors

Prof. Dr. Arne Astrup

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
