

Special Issue

Dairy Products Consumption for Human Health

Message from the Guest Editor

Dairy products are key contributors to dietary quality, since, in a mixed diet, they provide a considerable amount of nutrients. In the last decade, increasing attention has been focused on the impact of dairy products, particularly milk, on health, suggesting a neutral or protective effect against obesity, cardiovascular disease, metabolic syndrome, some cancers, inflammation, and type 2 diabetes. This Special Issue of *Nutrients* will address the impact of dairy product consumption on human health. Hence, we welcome the submission of original research articles or reviews investigating the association between the consumption of dairy products or their components and health throughout the lifespan. Health conditions could include, but are not restricted to, obesity, cardiovascular disease, metabolic syndrome, cancer, type 2 diabetes, neurodegenerative disease, and bone and mental health.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez
