Clinical Nutrition on Diabetes Complications

Message from the Guest Editor

Nutrition therapy plays a pivotal role in the prevention and management of type 2 diabetes and its micro- and macrovascular complications. Energy balance and nutrient quality have a profound impact on the physiological processes that regulate glucose homeostasis and are strong predictors of micro- and macrovascular complications. Beyond meal size and composition, it is now recognized that glucose metabolism and body weight control are also affected by the timing of nutrient consumption within the meal (e.g., the food sequence and nutrient preloads) and by the daily distribution of energy and macronutrient intake (e.g., early time-restricted feeding). In addition, the management of obesity in middle age and sarcopenia in the elderly is an important matter. It is especially important to consider how to treat elderly patients with reduced renal function (e.g., regarding the total amount of energy and protein preloads). The purpose of this Special Issue is, therefore, to collect contributions on how nutrients and dietary patterns influence glucose homeostasis and micro- and macrovascular complications in type 2 diabetes and prediabetes.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
