

Special Issue

Diets and Lipid Disorders

Message from the Guest Editor

I am pleased to announce the Special Issue of **Diets and Lipid Disorder**. This Special Issue will cover one of the most common public health issues the application of diets in the management of common lipid disorders. Among lipid disorders, abnormalities in cholesterol and lipoprotein metabolism are common among adults, leading to potential fatal cardiac events. Furthermore, abnormalities in lipid metabolism are one of the complications of other diseases including diabetes, and kidney and liver diseases, as well as obesity. Appropriate dietary and lifestyle approaches can significantly reduce the burden of lipid disorders. This “Special Issue” aims to invite prominent scientists, physicians, nutritionists, and other health professionals from all over the world to submit their basic and clinical work for publication in this “Open Access” journal, after a vigorous peer-review process. This Special Issue will bring together the latest information on the roles of dietary habits, dietary agents, functional foods, and dietary supplements in the management of human lipid disorders and associated complications.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
