The Implication of Digital Food Environment on Dietary Choices and Health

Message from the Guest Editors

Escalating healthcare costs of diet-related chronic disease will place greater demands on already overburdened healthcare systems. To stem the rapid rise in chronic disease globally, we need to understand the societal and environmental influences on population food choices and dietary intake. The way we purchase foods has changed, particularly in response to the COVID-19 pandemic. Now, with a click of a button, we can order supermarket groceries, prepared meals, or meal kits and takeaway foods, among others. However, there has been limited research to understand the health and policy implications of the digitisation of the food environment. There have been growing calls for greater research in this field from international bodies, such as the World Health Organization; however, current public health nutrition policies do not include strategies to address the challenges and opportunities it presents. This forms an innovative area for new research to navigate the potential negative public health impacts of the digital food environment on dietary choices and health outcomes and to ensure people have access to nutritious convenience food.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain
