

Special Issue

Nutritional Supplements, Exercise Interventions, and Skeletal Muscle Health

Message from the Guest Editors

Maintaining skeletal muscle is critical to the sustenance of healthy life. Skeletal muscle is the major metabolic tissue responsible for maintaining independent living as well as preventing or recovering from various metabolic diseases. Further, having a greater proportion of skeletal muscle to total body mass is associated with an increase in quality of daily living and survival. While a number of studies have reported the importance of a healthy diet and physical activity in skeletal muscle health, there is a need to enhance our understanding of the underlying mechanisms of specific nutritional administration and exercise intervention strategies to promote skeletal muscle health in various populations. Therefore, the purpose of this Special Issue on 'Nutritional Supplements, Exercise Interventions, and Skeletal Muscle Health' is to advance our knowledge concerning how specific nutritional supplements and exercise interventions can improve skeletal muscle health in various populations. This Special Issue welcomes research articles that address the association between nutrition and exercise intervention with skeletal muscle disorders.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
