Eating Behaviors, Body Composition and Neuro Vulnerability in Energy Metabolism Regulation

Message from the Guest Editor

In recent decades, there has been an increase in dietary protocols to treat chronic noncommunicable diseases and eating disorders (ED). Additionally, body composition and metabolic energy expenditure models were developed to help predict and/or understand the effects of diets. The concepts of neuro-vulnerability and alterations of synaptic connections in obese subjects with metabolic alterations and ED are currently emerging. In light of this, the influence of these factors in the success of clinical nutrition treatment requires further investigation. Despite numerous studies on the effects of dietary models such as the Mediterranean diet, it is necessary to investigate the specific effects of foods on body composition, metabolic parameters and neurological alterations related to human behavior, as well as on the microbiota. The latter, defined as part of the second human brain, must be evaluated both for its local effects on absorption and intestinal regularity, its role in eating habits and in the aggravation of the already recognized neuro-vulnerability in food addiction and in other EDs.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
