# **Special Issue**

# Animal-Originated Food Intake and Human Health

### Message from the Guest Editors

Diet is the main factor influencing the development of the body and maintaining its good condition. A properly balanced diet provides the body with all the compounds necessary for the proper functioning of the organism and its individual systems, such as the immune, digestive, or cardiovascular systems. The growing interest in diets targeted at narrow groups of consumers/patients or in restrictive/elimination diets makes it increasingly important to demonstrate the role of individual ingredients consumed in optimum, deficiency, or excess. This Special Issue will focus on both the positive and negative role of animal-derived diet compounds in maintaining health and preventing the development of disease at all stages of human life. We welcome submissions including, but not limited to, the following areas: -Human studies (epidemiological and interventional); -Mechanistic studies aiming at elucidating the biological basis of observed phenomena in in vitro and in vivo animal models.

## About the Journal

### Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peerreview and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

### Editors-in-Chief

#### Prof. Dr. Lluis Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain

 Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

#### Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

### **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.
