

## Special Issue

# The Interplay Between Nutrition, Oral Health, and the Effectiveness of Oral Care

### Message from the Guest Editors

We invite contributions that explore, but are not limited to, the following themes:

The role of personal, familial, and socio-environmental factors in shaping nutrition and oral health behaviors across all age groups.

Epidemiological and clinical studies examining the associations between dietary patterns, nutrient status, and oral diseases in specific age populations.

The impact of nutritional status on overall treatment outcomes following oral surgical and medical procedures.

Innovative strategies, educational programs, and technological interventions designed to improve the efficacy of both home care and clinical treatment through integrated nutritional and oral health support.

We welcome the submission of original research articles and comprehensive reviews that offer new insights into effective policies, preventive strategies, and clinical approaches. By disseminating this knowledge, we aim to ultimately enhance health practices, empower individuals, and optimize the quality of life for diverse populations by utilizing a holistic approach to nutrition and oral health.

## About the Journal

### Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
