The Relationship between Food Addiction/Eating Addiction and Dietary Intake

Message from the Guest Editor

Dietary intake is essential for sustaining life and it is carefully regulated based on internal needs by brain circuits. Although eating behavior is not typically labeled as 'addictive' in normal circumstances, some individuals can develop a compulsion for this behavior, similar to drug addiction. In fact, both drug-seeking behavior and food/eating addiction involve similar neural pathways. However, there is still an ongoing debate in the scientific community regarding the "food addiction concept" and this paradigm is recurrently revisited. Major controversy exists because food addiction can be considered as a substance-related disorder (food addiction), or a non-substance-related disorder (eating addiction). In this context, the Special Issue, "The Relationship between Food Addiction/Eating Addiction and Dietary Intake" aim to shed light on deeper in the understanding of the topic, considering the substantial gaps in the existing literature.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (UIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
