

Special Issue

Perioperative Enteral and Parenteral Nutritional Therapies

Message from the Guest Editors

We are pleased to invite you to submit original research or review papers focused on the nutritional strategies for preoperative and postoperative support for patients with surgical emergencies. Malnutrition has been noted to be an important factor in surgical outcomes. Patients who present with surgical emergencies and baseline malnutrition, commonly seen in our more elderly population, present an even greater challenge for rescue, and require sophisticated nutritional therapies. Despite advances in treatments for cancer, trauma, and other diseases, appropriate and well-timed nutritional support is not universally applied. Making the correct nutritional diagnosis and assessing nutritional risk is of paramount importance and will determine the course of therapy prescribed. This Special Issue aims to provide a road map for acute care surgeons to care for their patients with intestinal failure and to provide strategies to optimize elective surgery patients for all surgical specialties and we look forward to receive your paper related to this research topics.

About the Journal

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem
